About the project

The EU-Citizen.Science project is supporting the development of *citizen science* across Europe by creating a central platform for sharing knowledge, initiating action and supporting mutual learning. In doing so, our core activities are to:

[READ MORE](#)

Coordinate

The project will coordinate citizen science actions in Europe to share and cross-fertilise knowledge.

Engage

The project will engage with stakeholders to ensure that the platform and its content meet their needs.

Create

The project will create and populate the online platform, which will be developed over three years (2015-17).
